Mountain Block Walling

The strength of Mountain Block walling lies in it's versatility. From the basic task of adding a retaining wall for your lawn or raising your flower bed, to creating inspirational features, such as a tranquil pool or a graceful flight of steps, all these tasks can be easily achieved with Mountain Block.

Mountain Block is simple to use and you can easily create a firm and sturdy wall without the need for mortar. Each block is 8" deep and features a lip on it's base. This lip retains the block and, in effect, ties the wall together.

Sizes

Mountain Block Walling is available in the following individual sizes:
